|                                                                                 |       |
|---------------------------------------------------------------------------------|-------|
| Host Chapter: National Capital; Program Committee; and Transactions Staff ..... | VII   |
| 1983-84 Presidential Theme: Growth and Improved Technology                      |       |
| through International Cooperation by Richard P. Perry .....                     | VIII  |
| The 1983 Annual Meeting .....                                                   | X     |
| Plenary Address: The Forgotten Fundamentals of the Energy                       |       |
| Crisis by Albert A. Bartlett .....                                              | XII   |
| Summaries of Technical Sessions, Symposiums, Seminars, and                      |       |
| Forums .....                                                                    | XXXII |

## FIRST TECHNICAL SESSION

|      |                                                                                                                                                        |    |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 2760 | An Economic Analysis Code for Selecting Building Design Options by D.M. Flanagan, D.M. Hamblin, and B. Thomas, Jr. ....                                | 3  |
| 2761 | Development of a Simplified Graphical Procedure for Estimating the Energy Usage in Nonresidential Buildings by I. Sud and R.W. Wiggins, Jr. ....       | 29 |
| 2762 | The Decremental Average Ground-Temperature Method for Predicting the Thermal Performance of Underground Walls by J.M. Ackridge and J.F.J. Poulos. .... | 49 |
| 2763 | Withdrawn                                                                                                                                              |    |
| 2764 | Correlations for Convective Heat Transfer from Room Surfaces by E.F. Altmayer, A.J. Gadgil, F.S. Bauman, and R.C. Kammerud .....                       | 61 |

## SECOND TECHNICAL SESSION

|      |                                                                                                                                                 |     |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 2765 | Simplified Static-Regain Duct Design Procedure by S. Chun-Lun .....                                                                             | 78  |
| 2766 | Withdrawn                                                                                                                                       |     |
| 2767 | Computer-Aided Design of a Grinding Booth for Large Castings by M.D. Zarouri, R.J. Heinsohn, and C.L. Merkle. ....                              | 95  |
| 2768 | Numerical Computation of Trajectories and Concentrations of Particles in a Grinding Booth by M.D. Zarouri, R.J. Heinsohn, and C.L. Merkle. .... | 119 |
| 2769 | A Design Procedure for Estimating Air Intake Contamination from Nearby Exhaust Vents (RP-204) by D.J. Wilson .....                              | 136 |

## THIRD TECHNICAL SESSION

|      |                                                                                                                          |     |
|------|--------------------------------------------------------------------------------------------------------------------------|-----|
| 2770 | Total Energy Center Wellington Hospital Design of Systems and Services by A.C. Pande .....                               | 153 |
| 2771 | Dynamic Method for Evaluating Room-Size Air Purifiers by K.T. Whitby, G.R. Anderson, and K.L. Rubow                      | 172 |
| 2772 | Tobacco Smoke Odor Control—Development of a Test Model (RP-238) by F. Jarke, W. Stepp, and H.J. O'Neill .....            | 186 |
| 2773 | Air Quality in Public Buildings with Health Related Complaints by T.D. Sterling, E. Sterling, and H.D. Dimich-Ward ..... | 198 |
| 2774 | Analysis of Indoor Air Acceptability Data from a Public Buildings Ventilation Study (RP-352) by A. Dravnieks. ....       | 213 |
| 2775 | Utilization of Condenser Heat for Desiccant Dehumidifiers in Supermarket Applications by N.J. MacDonald .....            | 225 |

## FOURTH TECHNICAL SESSION

|      |                                                                                                                                    |     |
|------|------------------------------------------------------------------------------------------------------------------------------------|-----|
| 2776 | The Impact of Lighting Fixtures on Heating and Cooling Loads—Mathematical Model (RP-231) by H.D. Ball and D. Green .....           | 236 |
| 2777 | The Impact of Lighting Fixtures on Heating and Cooling Loads—Application to Design (RP-231) by H.D. Ball .....                     | 259 |
| 2778 | Applying the Techniques of Process Control to the HVAC Process by B.G. Liptak .....                                                | 288 |
| 2779 | Simple Design Method for Shading Devices and Passive Cooling Strategies Based on Monthly Average Temperatures by B.J. Novell ..... | 308 |
| 2780 | The Solar House by J.I. Starobin and L. Starobin .....                                                                             | 317 |

## FIFTH TECHNICAL SESSION

|      |                                                                                                                                                    |     |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 2781 | The Effect of Garment Design on the Thermal Insulation Values of Clothing (RP-317) by E.A. McCullough, B.W. Jones, and P.J. Zbikowski .....        | 327 |
| 2782 | Heat Flow Characteristics of Single and Multiple Layer Fabrics by K.S. Grise, G.C. Goswami, and C.B. Hassenbeohler, Jr. ....                       | 353 |
| 2783 | Modeling of a Residential Thermostat and the Duty Cycle of a Compressor-Driven HVAC System by N.V. Nguyen and V. Goldschmidt .....                 | 361 |
| 2784 | The Effect of a Time-Delayed Stack Damper on Off-Cycle Heat Losses for Residential Heating Equipment by C. Park, D.A. Didion, and G.E. Kelly ..... | 373 |
| 2785 | The Effect of Draft Hood Design on the Seasonal Efficiency of Gas-Fired Appliances (RP-242) by D.W. DeWerth .....                                  | 383 |

## SIXTH TECHNICAL SESSION

|      |                                                                                                                     |     |
|------|---------------------------------------------------------------------------------------------------------------------|-----|
| 2786 | Steady-State Reciprocating Water Chiller Models by J.J. Allen and J.F. Hamilton .....                               | 398 |
| 2787 | Simulation Model of a Vapor Compression Refrigeration System by H. Yasuda, S. Touber, and C.H.M. Machielsen .....   | 408 |
| 2788 | A Solid Alternative to Oil-Impregnated Capacitors by D.E. Koehl .....                                               | 426 |
| 2789 | Simulation Parameters and Methods of Finding Equilibrium Statepoints in Refrigerant Systems by S.D. Goldstein ..... | 436 |
| 2790 | A Mathematically Complete Analysis of Plate-Fin Heat Exchangers by S.D. Goldstein .....                             | 447 |

## SEVENTH TECHNICAL SESSION

|      |                                                                                                                                                                                                         |     |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 2791 | An Experimental Study of Flow Patterns During Condensation Inside a Horizontal Tube by T.N. Tandon, H.K. Varma, and C.P. Gupta .....                                                                    | 471 |
| 2792 | A Study of Water Vapor Transmission through Insulation under Steady State and Transient Conditions by L.R. Glicksman and S. Katsenelenbogen .....                                                       | 483 |
| 2793 | Formulations for the Thermodynamic Properties of the Saturated Phases of H <sub>2</sub> O from 173.5 K to 473.5 K (RP-216) by R.W. Hyland and A. Wexler .....                                           | 500 |
| 2794 | Formulations for the Thermodynamic Properties of Dry Air from 173.5 K to 473.5 K, and of Saturated Moist Air from 173.5 K to 372.5 K, at Pressures to 5 MPa (RP-216) by R.W. Hyland and A. Wexler ..... | 520 |
| 2795 | Formulations for Thermodynamic Properties of Moist Air at Low Pressures as Used for Construction of New ASHRAE SI Unit Psychrometric Charts (RP-257) by R.B. Stewart, R.T. Jacobsen, and J.H. Becker .. | 536 |

## EIGHTH TECHNICAL SESSION

|      |                                                                                                                                             |     |
|------|---------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 2796 | Energy Considerations in Hot-Gas Defrosting of Industrial Refrigeration Coils (RP-193) by W.F. Stoecker, J.J. Lux, Jr., and R.J. Kooy ..... | 549 |
| 2797 | A Multiple (Solar, Air, and Water) Source Heat Pump for Cold Climates (RP-247) by K.I. Krakow and S. Lin .....                              | 574 |
| 2798 | A Computer Model for the Simulation of Multiple Source Heat Pump Performance (RP-247) by K.I. Krakow and S. Lin .....                       | 590 |
| 2799 | Toward an Efficient Operation of a Series Solar Heat Pump System by T.Y. Bong .....                                                         | 617 |
| 2800 | A Generalized Computer Program for Analysis of Mixture Refrigeration Cycles by H.A. Connon .....                                            | 628 |

## SOCIETY BUSINESS

|                                                                           |     |
|---------------------------------------------------------------------------|-----|
| ASHRAE Officers, Directors, Committeemen, Staff .....                     | 643 |
| ASHRAE Technical Committees and Task Groups .....                         | 646 |
| 1983-84 ASHRAE Standards Project Committees .....                         | 655 |
| ASHRAE Past Meetings .....                                                | 659 |
| Society Presidents .....                                                  | 660 |
| ASHRAE Honors and Awards .....                                            | 661 |
| ASHRAE International Associates .....                                     | 666 |
| In Memorium, July 1982 to June 1983 .....                                 | 667 |
| Index of Technical and Symposium Papers, Volume 89, Parts 2A and 2B ..... | 669 |

## HOST CHAPTER

National Capital

## OFFICERS

Jose A. Reig, *President*  
Donald H. Luther, *President-Elect*  
Michael W. Woodford, *Vice-President*  
Gary Lukas, *Secretary*  
Harold DeVoe, *Treasurer*

## HOST COMMITTEE CHAIRMEN

Robert J. Evans, *General Chairman*  
Vincent D. Lee-Thorp, *Vice-Chairman & Finance*  
Clinton W. Phillips, *Honorary Chairman*  
Michael W. Woodford, *Secretary*  
Homer R. Arey  
Donald H. and Jean Luther  
Virender Puri  
Frank E. Williams  
James F. Shivar  
James C. Easter  
James H. Payne  
Herbert L. Arey  
Shigeki Hiratsuka  
Robert R. Jones  
Fred Reed

## 1982-83 ASHRAE PROGRAM COMMITTEE

Ronald A. Cole, *Chairman*  
Robert C. Moyer, *Vice-Chairman*  
James M. Calm  
William S. Fleming  
Detlef C. Goepfert  
Robert L. Gorton  
Alfred Greenberg  
Guy W. Gupton, Jr.  
Jim L. Heldenbrand  
Richard R. Hughes  
Robert J. McKee  
George A. Reeves  
William A. Schmidt  
Jack E. Tumilty

*Staff Liaison*  
Jack L. McClung, *Manager of Professional and Educational Programs*

## TRANSACTIONS STAFF

*Editor*  
Micki Geshwiler  
*Assistant Editor*  
Jennifer M. Bailey  
*Editorial Assistant*  
Joyce Odewahn  
*Production Manager*  
Stanley Beitler
