| Frank Coda, ASHRAE Executive Vice President Emeritus, Dies .....                  | xiii |
| State of the Society, Richard H. Rooley, FREng., 2003-2004 ASHRAE President ..... | xiv  |
| Inaugural Address, Ronald P. Vallort, 2004-2005 ASHRAE President.....             | xvii |
| Technical Program .....                                                           | xx   |

## TECHNICAL PAPERS

|             |                                                                                                                                                                                       |     |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>4694</b> | Measurements and Model Development for R-400 Series Refrigerants (RP-1215)<br>Vladimir Geller .....                                                                                   | 3   |
| <b>4695</b> | Operable Windows, Personal Control, and Occupant Comfort (RP-1161)<br>Gail S. Brager, Gwelen Paliaga, and Richard de Dear.....                                                        | 17  |
| <b>4696</b> | Heat Transfer through a Composite Wall with a<br>Rectangular Graybody Radiating Cavity: A Numerical Solution<br>Mohamed A. Antar and Lindon C. Thomas .....                           | 36  |
| <b>4697</b> | An Air-Conditioning Model Validation and Implementation<br>into a Building Energy Analysis Software<br>Kamel H. Haddad .....                                                          | 46  |
| <b>4698</b> | Application of Advanced Software Technologies and<br>Engineering Standards to Improve the Process of HVAC System Design<br>Michal Ciach, Aleksandra Duda, and Michal Januszczyk ..... | 55  |
| <b>4699</b> | Dehumidification Characteristics of Commercial Building Applications (RP-1121)<br>Michael J. Brandemuehl and Thosapon Katejanekarn.....                                               | 65  |
| <b>4700</b> | Indoor Air Quality of an Energy-Efficient, Healthy House with Mechanically Induced Fresh Air<br>R. Wendt, H. Aglan, S. Livengood, M. Khan, and E. Ibrahim.....                        | 77  |
| <b>4701</b> | A Comparison of Electrical- and Thermal-Load-Following CHP Systems<br>Ali A. Jalalzadeh-Azar .....                                                                                    | 85  |
| <b>4702</b> | A Preliminary Investigation on the Use of Ultra-Wideband Radar<br>for Moisture Detection in Building Envelopes<br>William M. Healy and Eric van Doorn.....                            | 95  |
| <b>4703</b> | A Study on the Control Methods for Radiant Floor Heating<br>and Cooling System in Residential Building<br>Seong-Ryong Ryu, Jae-Han Lim, Myoung-Souk Yeo, and Kwang-Woo Kim .....      | 106 |
| <b>4704</b> | Analysis and Validation of a Psychrometric Apparatus<br>João Batista Dias and Paulo Smith Schneider .....                                                                             | 117 |
| <b>4705</b> | Axial-Flow Air-Vapor Compression Refrigerating System<br>for Air Conditioning Cooled by Circulating Water<br>Shaobo Hou and Hefei Zhang.....                                          | 125 |

|             |                                                                                                                                         |     |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>4706</b> | Benefits of Multi-Building Electric Load Aggregation:<br>Actual and Simulation Case Studies (RP-1146)                                   |     |
|             | T. Agami Reddy, Jason K. Lukes, and Leslie K. Norford .....                                                                             | 130 |
| <b>4707</b> | Calculation of Food Freezing Times and Heat Transfer Coefficients (RP-1123)                                                             |     |
|             | Brian A. Fricke and Bryan R. Becker .....                                                                                               | 145 |
| <b>4708</b> | Calibration and Testing of Thermal Simulation Models of Air Heaters                                                                     |     |
|             | Per Blomberg, Elisabeth Mundt, and Tor-Göran Malmström .....                                                                            | 158 |
| <b>4709</b> | CFD-Based Parametric Study of Ventilation and<br>Diesel Exhaust in Locomotive Facilities (RP-1191)                                      |     |
|             | Liangcai Tan and Amy Musser .....                                                                                                       | 167 |
| <b>4710</b> | Climatic Impacts on Heating Seasonal Performance Factor (HSPF)<br>and Seasonal Energy Efficiency Ratio (SEER) for Air-Source Heat Pumps |     |
|             | Philip Faurey, Danny S. Parker, Bruce Wilcox, and Matthew Lombardi .....                                                                | 178 |
| <b>4711</b> | Coefficient of Performance of Fluorinated Ether and Fluorinated Ether Mixtures                                                          |     |
|             | Ismail Kul, Darryl D. DesMarteau, and Adolph Beyerlein .....                                                                            | 189 |
| <b>4712</b> | Performance Analysis of Low-Pressure Household Water Heaters                                                                            |     |
|             | P.K. Bansal .....                                                                                                                       | 196 |
| <b>4713</b> | Development of Energy-Efficient Single-Coil Twin-Fan<br>Air-Conditioning System with Zonal Ventilation Control                          |     |
|             | S.C. Sekhar, Uma Maheswaran, K.W. Tham, and K.W. Cheong .....                                                                           | 204 |
| <b>4714</b> | Domestic Hot Water End Use Analysis Methods and Preliminary Results (RP-1172)                                                           |     |
|             | Dale K. Tiller, Gregor P. Henze, Ronny Goepfert, and Xin Guo .....                                                                      | 218 |
| <b>4715</b> | Double-Walled Heat Exchanger Risk Analysis for Group B1 and Group B2 Refrigerants (RP-1042)                                             |     |
|             | Aaron E. Berger, Donald L. Fenton, Prasad V. Kaitay, Shuting Lei.....                                                                   | 235 |
| <b>4716</b> | Effect of Boundary Conditions on the Prediction of Temperature Distribution for Curtain Walls                                           |     |
|             | Hua Ge and Paul Fazio.....                                                                                                              | 249 |
| <b>4717</b> | Effect of Ventilation System on Particle Spatial Distribution in Ventilated Rooms                                                       |     |
|             | Xinlei Wang, Yuanhui Zhang, Ted L. Funk, Lingying Zhao, and Gerald L. Riskowski.....                                                    | 258 |
| <b>4718</b> | Full-Scale Burning Tests of Mechanical Smoke Exhaust in Large Atrium                                                                    |     |
|             | L. Yi, W.K. Chow, R. Huo, N.K. Fong, Y.Z. Li,<br>C.W. Leung, C.L. Shi, W.Y. Hung, and H.B. Wang .....                                   | 267 |
| <b>4719</b> | Heat and Moisture Production of Poultry and Their Housing Systems: Molting Hens (RP-1044)                                               |     |
|             | H. Justin Chepete and Hongwei Xin .....                                                                                                 | 274 |
| <b>4720</b> | Heat and Moisture Production of Poultry and<br>Their Housing Systems: Pullets and Layers (RP-1044)                                      |     |
|             | H. Justin Chepete, Hongwei Xin, Manuel C. Puma, and Richard S. Gates .....                                                              | 286 |
| <b>4721</b> | Indoor Humidity Modeling and Evaluation of Condensation on Interior Surfaces                                                            |     |

| <b>4722</b> | Integrated Damper and Pressure Reset for VAV Supply Air Fan Control<br>Guanghua Wei, Minsheng Liu, and David E. Claridge .....                                                                                | 309 |
| <b>4723</b> | Laboratory Observations of Biocide Efficacy in Model Cooling Tower Systems (RP-954)<br>Ian Smith, Elizabeth J. Fricker, Jason Eccles, and Rosalind Searle .....                                               | 314 |
| <b>4724</b> | Method of Thermal Metering on the Air Side for Fan Coil Units<br>Ye Yao, Zhiwei Lian, Yixiong Hu, and Zhijian Hou .....                                                                                       | 325 |
| <b>4725</b> | Minimizing TEWI in a Compact Chiller for Unitary Applications<br>Philip R. Barnes and Clark W. Bullard .....                                                                                                  | 335 |
| <b>4726</b> | Multidimensional Effects of Ground Heat Transfer on the Dynamics of Building Thermal Performance<br>Gerson H. dos Santos and Nathan Mendes .....                                                              | 345 |
| <b>4727</b> | Natural Convection Heat Transfer for Fin-Tube Heat Exchangers<br>Y.K. Chuah and C.T. Chen .....                                                                                                               | 354 |
| <b>4728</b> | Neural Network Optimal Controller for Commercial Ice Thermal Storage Systems<br>Darrell D. Massie, Jan F. Kreider, and Peter S. Curtiss .....                                                                 | 361 |
| <b>4729</b> | Numerical Analysis of the Movement of Biological Particles in Two Adjacent Rooms<br>Bin Zhao, Ying Zhang, and Xianting Li .....                                                                               | 370 |
| <b>4730</b> | Numerical Study of the Similarity Law for the Cross-Flow Fan of a Split-Type Air Conditioner<br>Yang-Cheng Shih, Hung-Chi Hou, and Hsueh-Cheng Chiang .....                                                   | 378 |
| <b>4731</b> | Overview of Existing Guidance and Ventilation Approaches<br>for Control of Diesel Exhaust Inside Locomotive Facilities (RP-1191)<br>Chadwick C. Rasmussen, Amy Musser, Kimberly Bunz, and Matthew Radik ..... | 389 |
| <b>4732</b> | Simple Approach to Evaluate the View Factors between<br>Internal Heat Sources and Their Environment<br>Qingpeng Wei and Yi Jiang .....                                                                        | 400 |
| <b>4733</b> | Simulation and Performance Analysis of Lithium Bromide/Water<br>for Absorption Heat Transformer Cycle Systems<br>C.C. Chuang, D.C. Sue, and Y.T. Lin .....                                                    | 409 |
| <b>4734</b> | Smoke Control for Retail Shops with Cabin Design<br>W.K. Chow .....                                                                                                                                           | 417 |
| <b>4735</b> | Study of Typical Meteorological Years and Their Effect on<br>Building Energy and Renewable Energy Simulations<br>H. Yang and L. Lu .....                                                                      | 424 |
| <b>4736</b> | Thermal Performance Characteristics of an Energy-Efficient, Healthy House<br>E.A. Ibrahim, H. Aglan, M. Khan, M. Bhuyan, R. Wendt, and S. Livengood .....                                                     | 432 |
| <b>4737</b> | Proposed Tools and Capabilities for Proactive Multi-Building Load Management:<br>Part 1—Customer Aggregation (RP-1146)<br>T. Agami Reddy and Leslie K. Norford .....                                          | 443 |

|             |                                                                                                                        |     |
|-------------|------------------------------------------------------------------------------------------------------------------------|-----|
| <b>4738</b> | Proposed Tools and Capabilities for Proactive Multi-Building Load Management:<br>Part 2—Aggregated Operation (RP-1146) |     |
|             | Leslie K. Norford and T. Agami Reddy .....                                                                             | 457 |
| <b>4739</b> | Verification of a Neural Network-Based Controller for Commercial Ice Storage Systems                                   |     |
|             | Darrell D. Massie, Jan F. Kreider, and Peter S. Curtiss .....                                                          | 471 |
| <b>4740</b> | Wind Effects on Performance of Static Smoke Exhaust Systems: Horizontal Ceiling Vents                                  |     |
|             | W.K. Chow and J. Li .....                                                                                              | 479 |
| <b>4741</b> | An Oil Circulation Observer for Estimating Oil Concentration<br>and Oil Amount in Refrigerant Compressors              |     |
|             | Xiang-Dong He, Tao Cheng, Shinichi Kasahara, and Harry H. Asada .....                                                  | 489 |

## SYMPOSIUM PAPERS

### NA-04-1 Refrigerant Flammability and Other Properties

|                                                                                               |     |
|-----------------------------------------------------------------------------------------------|-----|
| Viscosity Measurements and Model Comparisons<br>for the Refrigerant Blends R-410A and R-507A  |     |
| Arno Laesecke .....                                                                           | 503 |
| Measurements and Model Development for R-400 Series Refrigerants (RP-1215)                    |     |
| Vladimir Geller                                                                               |     |
| (See Technical Paper 4694, p. 3)                                                              |     |
| Burning Velocity and Refrigerant Flammability Classification                                  |     |
| Tony Jabbour and Denis F. Clodic .....                                                        | 522 |
| Assessing Combustion Hazard of Flammable Gases: Revision of RF-Number                         |     |
| Shigeo Kondo, Kenji Takizawa, Akifumi Takahashi,<br>Kazuaki Tokuhashi, and Akira Sekiya ..... | 534 |

### NA-04-2 HVAC Is for People

|                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Thermal Comfort and Adaptation in Semi-Outdoor Environments                                                                                              |     |
| Junta Nakano and Shin-ichi Tanabe .....                                                                                                                  | 543 |
| Operable Windows, Personal Control, and Occupant Comfort (RP-1161)                                                                                       |     |
| Gail S. Brager, Gwelen Paliaga, and Richard de Dear                                                                                                      |     |
| (See Technical Paper 4695, p. 17)                                                                                                                        |     |
| A Stochastic Approach to Thermal Comfort—Occupant Behavior and Energy Use in Buildings                                                                   |     |
| J. Fergus Nicol and Michael A. Humphreys .....                                                                                                           | 554 |
| Do People Like to Feel “Neutral”? Response to the ASHRAE Scale of<br>Subjective Warmth in Relation to Thermal Preference, Indoor and Outdoor Temperature |     |
| Michael A. Humphreys and J. Fergus Nicol .....                                                                                                           | 569 |
| Thermal Comfort in the Climatic Conditions of Southern Italy                                                                                             |     |
| Ida Fato, Francesco Martellotta, and Cecilia Chiancarella .....                                                                                          | 578 |
| Recalibration of the Complaint Prediction Model (RP-1129)                                                                                                |     |

| Thermal Profile of a High-Density Data Center—<br>Methodology to Thermally Characterize a Data Center<br>Roger R. Schmidt ..... | 635 |
| Liquid Cooling—Friend or Foe<br>Donald L. Beaty .....                                                                           | 643 |

### **NA-04-5 Recent Findings in Water Heating Technology**

|                                                                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Hot Water Use in a High School Cafeteria<br>Carl C. Hiller, Jeffrey Miller, and David R. Dinse .....                                                        | 655 |
| Measured Performance and Impacts of “Drop-In” Residential Heat Pump Water Heaters<br>John J. Tomlinson and Richard W. Murphy .....                          | 664 |
| Numerical Evaluation of Alternative Residential Hot Water Distribution Systems<br>Evelyn Baskin, Robert Wendt, Roberto Lenarduzzi, and Keith Woodbury ..... | 671 |
| Online Domestic Hot Water End-Use Database (RP-1172)<br>Dale K. Tiller, Gregor P. Henze, and Xin Guo .....                                                  | 682 |
| Field Performance of HPWH Preheating for Water Heating Systems in Schools<br>David R. Dinse, Hugh I. Henderson, and John O. Richardson, Jr. ....            | 690 |

### **NA-04-6 Forced Air Distribution System Performance**

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Field Observations of Room Air Distribution Performance in a High-Performance Home<br>Keith A. Temple .....                                                | 699 |
| Characterization of Airflows at the Exit of Registers Using Laser Doppler Velocimetry (LDV)<br>Narinder K. Tutu, C.R. Krishna, and Thomas A. Butcher ..... | 709 |
| An Analysis of the Effective R-Value for Insulation Buried Attic Ducts<br>Dianne Griffiths and Marc Zuluaga .....                                          | 721 |
| Evaluation of Two New Duct Leakage Measurement Methods in 51 Homes<br>Paul W. Francisco, Larry Palmiter, Erin Kruse, and Bob Davis .....                   | 727 |
| Validating and Improving the Delta-Q Duct Leakage Test<br>Darryl Dickerhoff, Iain Walker, and Max Sherman .....                                            | 741 |

#### **NA-04-7 Integration in Cleanroom Design and Construction**

|                                                                                                                                               |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Using Certification Data of Cleanrooms to Determine Degradation and Retrofit<br>Susan D. Morrison .....                                       | 755 |
| Quantitative Multistage Pressurizations in Controlled and Critical Environments<br>Wei Sun .....                                              | 759 |
| Using Benchmarking to Identify Energy Efficiency<br>Opportunity in Cleanrooms: The Labs 21 Approach<br>William Tschudi and Peter Rumsey ..... | 770 |
| Controlled Clean Operating Room Area<br>J. Shen .....                                                                                         | 776 |

#### **NA-04-8 Modeling Moisture Sorption/Desorption by Building Materials**

|                                                                                                                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Evaluation of Moisture Buffer Effects by Performing Whole-Building Simulations<br>Carsten Rode, Nathan Mendes, and Karl Grau .....                                                                                               | 783 |
| Effect of Moisture on Hygrothermal and Energy Performance of a<br>Building with Cellular Concrete Walls in Climatic Conditions of Poland<br>Dariusz J. Gawin, Marcin Koniorczyk, Aldona Wieckowska, and Elisabeth Kossecka ..... | 795 |
| Moderating Indoor Conditions with Hygroscopic Building Materials and Outdoor Ventilation<br>Carey J. Simonson, Mikael Salonvaara, and Tuomo Ojanen .....                                                                         | 804 |
| Predicting Indoor Temperature and Humidity Conditions<br>Including Hygrothermal Interactions with the Building Envelope<br>Andreas H. Holm, Hartwig M. Künzeli, and Klaus Sedlbauer .....                                        | 820 |

#### **NA-04-9 Load Calculations**

|                                                                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Application of Conduction Transfer Functions and<br>Periodic Response Factors in Cooling Load Calculation Procedures<br>Ipseng lu and D.E. Fisher .....                                    | 829 |
| Heat Loss from Electrical and Control Equipment in Industrial Plants:<br>Part I—Methods and Scope (RP-1104)<br>Warren N. White, Anil Pahwa, and Chris Cruz .....                           | 842 |
| Heat Loss from Electrical and Control Equipment in Industrial Plants:<br>Part II—Results and Comparisons (RP-1104)<br>Warren N. White, Anil Pahwa, and Chris Cruz .....                    | 852 |
| We're on Deadline—Printing Press Heat Gain Is More (or Less) than Just Motor Load<br>Dennis J. Wessel .....                                                                                | 871 |
| Heat Transfer through a Composite Wall with a<br>Rectangular Graybody Radiating Cavity: A Numerical Solution<br>Mohamed A. Antar and Lindon C. Thomas<br>(See Technical Paper 4696, p. 36) |     |
