PUBLIC REVIEW—CALL FOR COMMENTS

Constructive comments are invited for the following Public Review Drafts, which can be accessed on ASHRAE's website at <https://www.ashrae.org/technical-resources/standards-and-guidelines/public-review-drafts>. All activity for reviewing and commenting on public review drafts can be accomplished completely online. To obtain a paper copy of any Public Review Draft contact ASHRAE, Inc. Attn: Standards Public Review, 180 Technology Parkway, Peachtree Corners, GA 30092, or via email at: standards.section@ashrae.org. **Note: Paper copies are available for \$35.00/copy if 100 pages or less and \$45.00 if over 100 pages.**

**30-day Public Review from
May 19, 2023, to June 18, 2023**

- ♦ **1st Advisory Public Review of BSR/ASHRAE/IES Addendum I to ANSI/ASHRAE/IES Standard 90.1-2022, *Energy Standard for Sites and Buildings Except Low-Rise Residential Buildings***

Through this advisory public review, Standard 90.1 is soliciting feedback about a proposed informative appendix that jurisdictions could adopt to achieve a zero emission (ZE) building. The appendix demonstrates the necessary modifications to existing Sections 3, 4, and Appendix G to achieve zero emission requirements. The new appendix is based on the Performance Rating Method as modified with new targets for the Performance Energy Index Site (PEI_{site}) and Performance Emissions Index Greenhouse Gas (PEI_{CO2e}) metrics. Jurisdictions have flexibility to determine their timeline for reaching the zero-emission target.

- ♦ **1st Public Review of BSR/ASHRAE/ICC/USGBC/IES Addendum bd to ANSI/ASHRAE/ICC/USGBC/IES Standard 189.1-2020, *Standard for the Design of High-Performance Green Buildings Except Low-Rise Residential Buildings***

This addendum deletes the exception to Section 7.5.4 of the standard. The exception is no longer needed because of published addendum A to Standard 209. Section 11 reference with Addendum A is added. Standard 209 - Addendum A is added below the line for informational purposes only.

- ♦ **2nd Public Review (ISC) of BSR/ASHRAE/ICC/USGBC/IES Addendum ao to ANSI/ASHRAE/ICC/USGBC/IES Standard 189.1-2020, *Standard for the Design of High-Performance Green Buildings Except Low-Rise Residential Buildings***

This addendum (ISC) modifies Section 10.4.2, IAQ Construction Management and System Startup. Section 10.4.2 (d) strikes the requirement to cover permanent HVAC vents during activities that produce dust since these activities could prove harmful and unproductive to workers in an unconditioned environment. Section 10.4.2(e), is modified to allow operation of permanent HVAC systems during construction provided that they are protected from dirt, dust, and debris, and that all filters and controls are in place and operational. Section 10.4.2(f) is modified editorially, with no change in the requirement.
